

EDUCATION

COWES ENTERPRISE COLLEGE

NARRATIVE

The students and staff at Cowes Enterprise College can now be assured of high-quality CCTV Security. At the time of the original construction of the facility, CCTV technology was just on the cusp of changing from analogue to digital. Sadly, the college missed out on the new technology at the time. Now by partnering with the fire and security experts at Lifeline, the school now benefits from the latest digital IP cameras providing up to 4K image resolution.

Cowes Enterprise College is a 21st Century coeducational secondary school facility and sixth form College with academy

status. Set in its own substantial grounds the modern building, staff and teachers look to deliver excellence and outstanding education to its students. The new £37m building was completed in September 2013 and provide education to over 1000 students.

For the school to be able to offer a safe environment, effective pupil safety and management, the school decided that the CCTV system originally delivered as part of the building was not proving to be satisfactory.

Images were of poor lighting quality, the system infra structure was cumbersome

and difficult to operate. Often when images were required they were not of sufficient quality to be able to obtain satisfactory or usable evidence.

Image quality is not the only enhancement, fast access to recorded images means that the teaching staff do not have to waste valuable time searching through hours of footage for incidents or security breaches, now such recovery is near instant.

OUR RELATIONSHIP

Cowes Enterprise College commissioned Lifeline, local Fire & Security experts to design and install a new system that would fully meet the requirements of the school. Lifeline and Cowes Enterprise College commenced planning the system design in 2018 and close collaboration meant the results were delivered in April 2019 exactly as the client required, in

many cases exceeding expectations. The new 64 Camera System builds a platform for future expansion and provides one of the most comprehensive CCTV systems at educational facilities on the Island. The system installation was completed during a two-week school holiday period with no disruption to the school.

HOW LIFELINE HELPED

The solution delivered by Lifeline involved their CCTV Partners HIK Vision, who are the worlds leading CCTV manufacturers. Lifeline are the only HIK Vision Approved Partners on the Isle of Wight, meaning clients can be assured of authentically

sourced and genuine products, the highest quality and standards, three years warranties, fully trained engineers and exceptional post-sales support.

Ross Murphy from Cowes Enterprise College thanked Lifeline stating that the 'Service had been excellent'.

“ The delivery of an effective CCTV System should be carried out a professional manner. There should never be a 'one size fits all' scenario. Systems need to be designed, cameras should be selected to deliver results according to the environment they are placed in, image quality, refresh rates, file compression sizes, recording schedules should all be considered. Above all the clients' requirements and expectation must be discussed, agreed and finally delivered to meet that expectation. I am pleased to say that in this as with all cases we delivered to exceed customer expectations. ”

Mark Lee - Lifeline

Lifeline: Protecting homes and businesses for over 30 years.

Working with you to look after your individual fire and security needs. Solutions available with 24 hour monitoring, remote viewing and control through smartphones and tablets, with Police, Fire & Keyholder response.
