LIVE VIEW FUNCTION
THIS GUIDE REFERS TO THE LOCAL USE WITH THE MOUSE CONNECTED.
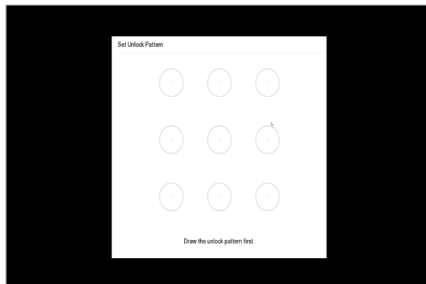

SITE REF:

RECORDER USERNAME:

HIK-CONNECT NAME:

NUMBER OF DAYS RECORDING:

INSTALLATION DATE:

PASSWORD:

STEP 1

Login to device: username or pattern method (password is case sensitive).

STEP 2

Starting live view: Start by selecting the camera icon on the top menu bar, this allows live view.

STEP 3

Adjusting the live view layout: Select the icon, this will then allow the screen layout to be set as required, you can then highlight any box in the layout and select a camera from the left to display.

STEP 4

Icon legend on main view screen

< > Next or Previous screen

⤢ Make layout full screen

↻ Switch the layout auto switch function on or off
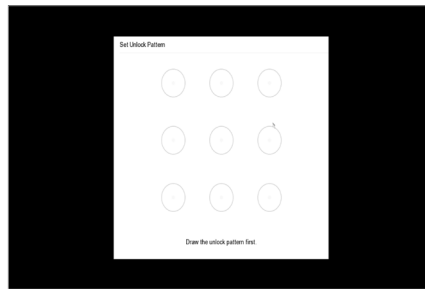

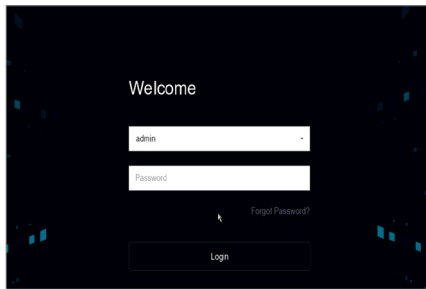

PLAY BACK MENU

**STEP 1**

Login to device: username or pattern method

(password is case sensitive)

STEP 2

From the top menu bar select the playback icon

NVR 4.0

STEP 3

Start by selecting the camera(s) from the left hand selection (Max 16) and the time and date you would like to playback from. Playback can only go back according to the retention period set upon installation. You can also change the layout using the screen layout option again. Anything marked with a blue triangle on the date range indicates video evidence may exist
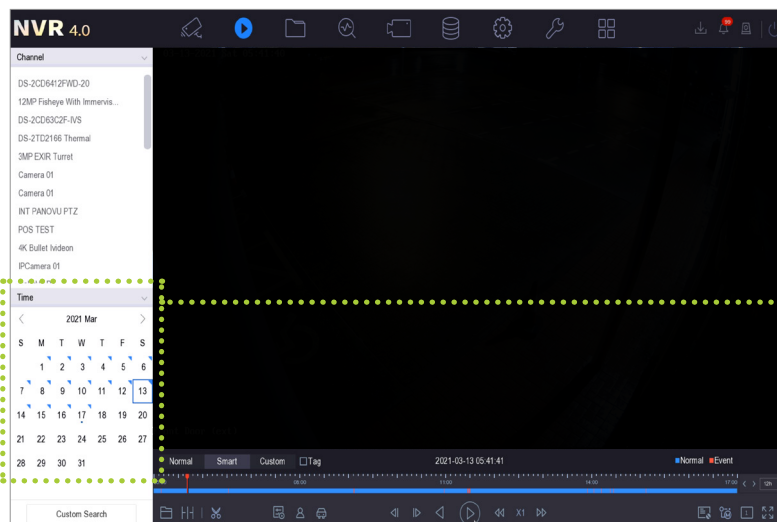

PLAY BACK MENU   Continued

STEP 4

Once the camera(s) and time & date have been selected, the playback will begin in the main window, this is the NORMAL playback function as selected above the timeline. Depending on the setup you will have blue and red markers in the timeline, blue marks constant record, red is event markers for motion, VCA etc.

STEP 5

Playback controls: Once playback has started you are able to pause, play, rewind, speed up and slow down footage using the standard DVD type controls, this allows precise control over the video selection.
STEP 6

In each camera pane you are able to click and select options as per below tool bar. From left to right, snapshot to be saved in local HDD, Tagging to allow easy searching of footage again, Digital Zoom, Audio on/off if supported, Locking of footage, VCA search function, Fisheye camera dewarping (fisheye camera required).

SMART SEARCH FUNCTION
**THIS GUIDE REFERS TO THE LOCAL USE WITH THE MOUSE CONNECTED.**

STEP 1

**Login to device:** username or pattern method

(password is case sensitive)

STEP 2

When logged in please go to the playback menu using the playback icon

NVR 4.0

In smart playback mode, the device can analyse videos that contain motion, line or intrusion detection information, and mark them in red.

Go to Playback, click Smart, and then click motion detection (⊞), line crossing detection (✎), or intrusion detection (☐) in the toolbar at the bottom to search and play the video as you desire.

For certain camera models that can detect human and vehicle, you can click (🖨) and (👤) to search human and vehicle targets. When you are playing back human and vehicle videos, it cannot search line crossing detection (✎) and intrusion detection (☐) videos which are based on the human and vehicle videos.
You can also use Custom search function that will allow you to define the search parameters as below

You can play the video by customised search conditions

1. Go to **Playback**
2. Select camera(s) from the list
3. Click **Custom Search** on the bottom left
4. Enter search conditions, including Time, File Status, Event Type, etc
