- Award Winning Service

Simple, Professional, Reliable

Wired or Wireless Installation

Choose your preferred system type, wired or wireless. Detection includes Movement, Harsh Environment, Shock Sensors, Smoke Detection, Door & Window Contact Switches.

Wireless installations offer least property disruption, are quick to install and are highly reliable. Wired systems lend well for new builds, renovations and refurbishment projects.

Secure Remote Support

We support your system day and night with our secure remote connection service. Change users, remote maintenance, firmware, security upgrades and diagnostics with limited need for engineer site attendance.

Smart Device Control

Control your system using the Smart Device App. Check events, logs, set and unset the system, receive notification of activations all from the palm of your hand. (internet connection required.)

GPRS Signalling

Fast digital off site GPRS communication ensures your system delivers notifications 24hours a day, without the need for a telephone line.

Friendly Support Team

Our dedicated friendly highly trained team of professionals are on hand to provide all the support you need. This team work to ensure your complete satisfaction & compliance to British & European Standards, Police and Insurance requirements. Project Managers assigned to your project to ensure complete delivery.
